Programmer: Dave Allen

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 5.0.0.3 is Available for Downloading

The updated version 5.0.0.3 is now available for download. This version has solved some glitches that we encountered in previous versions on the processing side and is ready to go for the 2018 calendar year skiing season.

Slalom Speed Above Division Max Scoring Correction To Date Of Implementation

The board of directors voted to implement this new rule on the day after the 2018 Nationals are completed. When a speed above maximum is selected for a skier in an E/L/R class event, the scores will be noted and recorded at the division maximum.

Deleting All Of A Trick Skiers Tricks Left Zero Score In Scorebook

After deleting all of a skier's tricks on both passes, a score of zero was still remaining in the scorebooks and all of the reports. This anomaly has been corrected and if there is not any data remaining or entered for the skier, they will not appear in the scorebooks nor reports for the trick event.

Boat Selection Process Updated

The selection of boats for the Towboat Usage report and for each of the events has been completely revised and will be much easier to use. Dave added a "Refresh" button on the window so that you can update the list with a click of the mouse, rather than closing and reopening the list. The best part is you can now find the boat being used in the event and double click on the row and the boat will move to the window ready for you to enter the model year and go to work. Thank You for making this easier for all of us!

Also the 2018 approved towboats are in the list and ready to go.

NCWSA Template And Export Problems Solved

There was an issue when importing the A and B team members into the template with the A team importing, but the B team got lost in the shuffle, also there was an issue with a skier being listed as an A team member and also a B team member and the import was not handling these issues properly and now, both of these issues have been fixed and are working properly.

There was an issue when exporting the non-team skiers, the entries were not being exported and this issue has been resolved and is working properly.

Special Event And Skier Filters Added To AWSA Special Team Summary

Dave has added the capability to filter the results by event and skier category. To utilize the filters, you first will need to run the report and then the filters are allowed and these filtered results can then be printed.

That's the latest news and we will begin using the newest version this weekend in Florida and start having fun on the water again.
