

WSTIMS FOR WINDOWS USERS NEWSLETTER

April 26, 2018

ISSUE 03

VOL. 18

Editor: Jeff Clark

jclarksr94@gmail.com

Programmer: Dave Allen

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 5.0.0.4 is Available for Downloading

The updated version 5.0.0.4 is now available for download.

Record Form Auto Fill Requirements

The record form that is built into the program is designed by the technical Committee to provide all of the information and data gathered by WSTIMS when you are preparing and scoring your class ELR tournaments.

The very first thing that you must do when you arrive at the tournament sight and are beginning your setup is to set the date and time in your computer to the correct time zone and contact the Tech Controller for the tournament and have them do the same thing to their recording devices. This will enable you to give them the time of the performance from WSTIMS (hover pointer over the pass you are looking for, time will appear) so they can find the pass easily and accurately.

Don't forget to fill out the Chief Official Contact form, Boat Use form, enter the towboat in the event you are scoring (tricks is boat they used) and enter your officials in the events list as you go.

Doing this work ahead of time and as you go will assure you that you will not need to make these additions/corrections after the fact and run the report again.

New Slalom Detail Report for Tech Controllers

A new report for the Tech Controllers lists all of the details for all of the slalom passes in the tournament and they will need this report to send in with their reports on the tournament.

To produce the report, go to the Slalom tab > Slalom Pass Detail > Refresh to bring up the full report. You can then export the file to your tournament folder and the name of the exported file will be – SlalomPassDetailExport.csv. for copying to their thumb drive.

Corrected Maximum Speed Error For IWWF Age Divisions

WSTIMS was not recognizing the maximum speeds for the IWWF age divisions and this has been corrected along with several other minor housekeeping issues.

Popup Reminder At Start Of A Event Group And Round To Add Officials

A Popup reminder has been added for the ELR class event groups/age divisions to remind the scorer to enter the officials' assignments when the first skier is selected to be scored. Supports the Record Form request for information!

The Complete List Of Records Has Been Updated And Is Current

Just a reminder that WSTIMS can download and import the OLR template for your tournament and also give you access to the membership database to find and add skiers to your tournament. All you will need is to make sure and add the sanction number and the edit code in the tournament setup screen. When you have completed the setup of the tournament and set WSTIMS to your tournament, go to >Administration > Import > Import Pre-registration From USAWS.

The entries will be imported and placed in your registration tab list.

Standard and Collegiate templates are downloaded as you have done in the past and then imported into WSTIMS.

Happy skiing days are here in Florida and southern California, so things are looking better for getting some lake time! Have fun!
