ISSUE 04

VOL. 19

Editor: Jeff Clark

jclarksr94@gmail.com

Programmer: Dave Allen

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 5.0.1.7 is Available for Downloading

The updated version 5.0.1.7 is now available for download. This version solved a few glitches in the programming that will make your usage better.

Registration Template Errors

There have been some problems with the registration template build with some of the skiers that had multiple age group choices. Dave identified the problem and it is working properly now.

Previous Pass Slalom Corrections Scoring Errors

When a bad time was entered for a pass, the program automatically checked the reride box and after correcting the time to one that is in tolerance, the program did not uncheck the reride box which caused the next pass score to be scored in correctly. This problem has been resolved and is a good reminder to always check you total buoy score for the skier before moving to the next skier.

Live Web Running Order

The running orders on the Live Web were not refreshing after changes. This has been corrected.

Have fun this weekend and stay dry.
