ISSUE 01

VOL. 22

Editor: Jeff Clark

jclarksr94@gmail.com

Programmer: Dave Allen

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed, send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 7.1.0.1 is Available for Downloading

The updated version 7.1.0.1 is now available for download. This update has most of the annual rule change updates and fixes bugs that were discovered last year that were on the “to do” list for the wintertime.

To be clear, this version is for the NCWSA tournaments that are starting now and will take care of all of their USA-WSWS membership and SafeSport issues for their tournaments.

The other updates involving the SurePath boat path program and are being implemented by the IWWF and AWSA for class “L & R” tournaments will be fully implemented in the next version of WSTIMS. This involves optional and mandatory rerides in the Slalom event.

Registration of Tournament Participants

This can now be handled completely through the AWSA member portal through the >Tournament >Registration section. There you can search for participants (skiers & Officials) and add them to your tournament template and the information is accurate when you view it. The **“MANUAL ADDITION OF A PARTICIPANT WILL NOT WORK!!!!”**

If you use the “OLR” system it will automatically take care of most all of your Registration, informational and Scoring issues.

Registration Template Changes

There are several new columns added to the Registration Screen that you need to make note of;

1. **“Eligible Part”** This means that the participant has met all of the required Membership, SafeSport and any other requirements that meet the USA-WSWS and USOPC criteria for Active, AWSA members to meet in order to participate and/or compete in the tournament.
2. **“WD”** This column should be checked if a skier has withdrawn“ from the tournament. This will leave them out of all of the scoring events and they will not be included in any of the reports. Their information will be there if they are later able to participate and then you just uncheck the “WD” box.
3. **“Membership Status”** this column will give you the issues that must be resolved before the person is cleared to participate/and/or compete in the tournament.
4. The IWWF “single use” license has been replaced by the “Full Ski Season” license effective immediately.

Trick Calculation Issues

There were issues that you found last year and some that were discovered by Dave over the winter. Rest assured that it is much better than it was and if you discover a specific issue, please let us know immediately. The warning message “officials for the event need to be entered” has been resolved with new search capabilities in the officials’ sections.

Jumping 3 Segment Times Adjusted

The 3 segment Jump times have been adjusted for 52m segment for 54kph and 51kph.

Live Web Results

Dave has completely revised the Live Web Scores function so that it will be far more reliable and not subject to the crashes that we have had in the past.

That’s it fir now, go ahead and download the latest version and either open his old “test” version in the program or if you have all of the sanctioning information for one of your 2022 tournaments, go ahead and work through all of the tabs mentioned in this newsletter.

Let us know how it works for you and thanks, Jeff and Dave
