This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 5.0.1.10 is Available for Downloading

The updated version 5.0.1.10 is now available for download. Mostly housekeeping issues that Dave has cleaned up, but there are a few notes that need your attention.

Entering Towboats Used In Event Screens

Dave has added a boat owners and notes column to the Towboat usage screen so that it will be easier to identify each of the boats being used in the tournament.

Several years ago we added a Towboat box on each of the scoring screens to record the boat being used for the Towboat report that is exported and sent to headquarters for the Towboat committees use in determining the qualifications for a towboat to pull Regionals and Nationals events. It is very important that you enter this information is all of the scoring screens (closed and open tournaments) so that the numbers are accurate for the Towboat committee. All of this data gets into the system electronically now rather than back in the old days when it was entered manually. A few seconds of your time and two mouse clicks will help immensely and be appreciated by the Towboat committee!

Team Summary To Live Web

The issues that prevented this important information from being displayed properly has been corrected and is working fine now.

Running Order Updates

The running order screen will update and populate the data grid after you click on the refresh button in order to speed up the process in large tournaments.

Hope you have had a great summer and we will see you at the Nationals if you are going, otherwise we will see you in the funny papers.
