

WSTIMS For Windows
Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	5.0.1.10	Team Summary	Export to Live Web is failing	There were issues with the Live Web database due to an upgrade this winter. Had to change some null values and change some numerics to eliminate commas in the number.
Closed	L	5.0.1.10	Slalom Entry	Difficult to identify boat to select when many boats in the list.	Adding owner and notes columns to the display to help with more data to help identify the right boat.
Closed	L	5.0.1.10	Trick Calc	Difficult to identify boat to select when many boats in the list.	Adding owner and notes columns to the display to help with more data to help identify the right boat.
Closed	L	5.0.1.10	Jump Entry	Difficult to identify boat to select when many boats in the list.	Adding owner and notes columns to the display to help with more data to help identify the right boat.
Closed	L	5.0.1.10	Running Order	When data has been changed the updated data is not reflected when printed	Print information was not being updated when changes were made in information on the window. This has been updated to refresh the print information when print is requested.
Closed	L	5.0.1.10	Running Order	Window is populated automatically when opened. This is slow for larger tournaments.	Change window open to prepare the window but will not populate the data grid until the refresh button is used
