

WSTIMS For Windows
Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	7.0.3.0	Jump Entry	When WaterSkiConnect is active and select Pass as the result it is immediately adding the next pass. This is also happening in some cases for a fall.	There was a flaw in checking when to look for times and measurement for a Pass or Fall. Fixed
Closed	H	7.0.3.0	Jump Entry	When WaterSkiConnect is active it appears as those the process is looking for times but is only filling in 1 time.	This process was only support to look for times when the indicator was set but that was not being used properly. Times were being checked but only one time was being filled in. Both issues have been fixed.
Closed	L	7.0.3.0	Jump Entry	Resend feature not available.	The resend feature was added to slalom to resend pass data to ensure SurePass has the current information. This feature is needed for jump as well.
Closed	L	7.0.3.0	Jump Measurement Inp	Allow the distances attributes to be updated. This is needed when an incorrect distance was sent	Changed report to allow the feet and meters to be updated
