

WSTIMS For Windows
Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	L		Event Summary(s)	Consider adding a check box to indicate that a report is the final results. This is noted in IWWF rule 13.07	Added feature to publish reports that includes a signature from the chief scorer
Closed	M	7.1.0.13	Registration	It would be really nice if the EMS License had a column within the Registration Template. Toggling back and forth between Registration and Running Order to determine who is missing EMS/USA Waiver/SafeSport/USA Membership is tedious. Would be great if everything was in one spot.	Added new column on the Registration window for the EMS license. This will only be checked for skiers that enter an event as an L or R skier. If the skier didn't enter as L or R then it is not checked and will show as not having a license. You will still need to either update the skier using the Show Member feature or use the Running Order window to change the skier class to re-check the license.
Closed	M	7.1.0.13	Jump Boat Path Import Report	Need to change headers for jump	Updated boat path and boat time import reports
Closed	H	7.1.0.13	Tour Reg Add Member	Exception encountered when attempting to add skier from local MemberList table	Fixed issue that was causing exception. Now able to add from local MemberList. Consider re-establishing add new member functionality
Closed	M	7.1.0.13	Tour Reg Add Member	Add Update button to make it clear how to update a skier's information from the member database	Change text on button to Update when Show Member is used and leave at Add when the Add feature is used.
Closed	H	7.1.0.13	Import OLR	Skiers who are only skiing in Trick are not coming in with the OLR download. I have had this happen at a number of tournaments, but thought the team captains just forgot to register someone. We had this issue with All-Stars this weekend where each of the region teams had skiers who were not imported if you want to take a look	Found issue during import validation and it was not recognizing when a skier was entered in tricks only

Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	7.1.0.13	Slalom Entry - BPMS	22S110. Skier Luca scored 5 but the deviation was displayed for 6 which should be blank on the BPMS report.	Boat Path report was populating one extra buoy deviation when skier had a whole number bouy count
