

WSTIMS For Windows

Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	7.0.2.4	ExportIWWF	Eliminate using the memberid pattern table. Don't understand the purpose and know one knows how to update it for a new federation.	Fix to import process
Closed	H	7.0.2.4	Boat Path Report	<p>Updates for Will and Jerry</p> <p>We don't need the TXT file, only the HTML.</p> <p>I don't have any issue converting either one, but everyone else seems too.</p> <p>David, the Boat Path Report. As Will pointed out, from the tourn you can export HTML for Boat Path.</p> <p>Can a HTML report for Boat Path be auto submitted to all Regional Drivers and Regional TCs verse the TXT file that we are currently getting? He want need the TXT if we get the HTML.</p> <p>HTML is great for all, and it's easier to convert the HTML from Excel vs TXT if needed.</p> <p>JUMP Boat Path Deviation, there will be no CUMULATIVE for JUMP, that can be removed.</p> <p>Only one deviation/point at the buoy.</p> <p>And at the Masters, i notice that WSTIMS is receiving Sure-Path Times along with the</p>	Updated jump grid. Changed reporting on Boat Path Report to HTML
Closed	H	7.0.2.4	WaterSkiConnect	Reported issues with stability when internet connection is not strong.	Added additional exception handling. Added additional connection paramters. Hoping to eliminate issues with weak internet connections
