

WSTIMS For Windows Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	4.0.0.0	Slalom Entry	When all passes are deleted and then a new starting speed or line length is selected the original starting speed and line length are still getting set when the first pass is saved	An internal field that held the original starting speed and rope length was not being initialized when the last pass was being deleted. This has been corrected.
Closed	H	4.0.0.0	Slalom Entry	When a skier in an L/R class does not complete the pass at their maximum division speed the line length is not being properly recorded per IWWF rules.	Process was not recognizing how to properly handle setting rope length for IWWF class skiers when reaching the maximum division speed but not completing the pass. This has now been corrected.
Closed	H	4.0.0.0	Tournament Package	Encountered exception when attempting to build tournament package.	Error was occurring when more than 1 skier in a division had a zero score. Placement calculation was not properly handling this situation.
Closed	L	4.0.0.0	AWSA Records	New updates available	Updated 3 AWSA records
Closed	L	4.0.0.0	Official Work Record	Tournament had 1 official that was the chief for 2 events and another person for the other event but the OD.TXT file had both officials credited for all 3 events.	Updated process to check for event credits when chief and assistant chief are selected.
Closed	M	4.0.0.0	Import Data	Import of record failed when city had an apostrophe	Fixed an issue with the import. It was not properly handling the situation when the skier city had an apostrophe.
Closed	L	4.0.0.0	Scorebook	Add additional section for showing team results. Would like to see team skier results for all skiers on the team. Not as it pertains to the team score but strictly to see the skier results for all members of a team	Enhanced the report to show skiers that are not included in team score. These skiers are annotated with a double asterisk
Closed	H	4.0.0.0	Official Work Record	Unchecking credits for an official to eliminate the credit seemed to be working but was reset when the window was refreshed.	The issue was that the officials were still listed in the Official Work Assignments. They must be removed from there to eliminate the credit. During the update processing the assignments are re-checked to ensure that credits are being given if they are listed. Unchecking the credit without removing the assignment will not eliminate the credit.
Closed	H	4.0.0.0	Team Summary	Check the results in collegiate combined score. Need to be sure that B team skiers are not included in this result. The detailed report is showing B team skiers but not sure if this is the calculated team score	Fixed the issue and the report is now correct.
Closed	L	4.0.0.0	Scorebook	just reading results in the back of waterskier, i noticed it says st for those skiers that skied on a team, going forward can we change that to team as a header so the public understands why those skiers are tagged so to speak?	Added both state and team to the report. Scott is checking to see if this format will work.
Closed	M	4.0.0.0	Slalom Entry	When checking for records a skier participating in an Open or Master division the records for eligible age divisions should also be checked	
Closed	H	4.0.0.0	Overall Summary	Skier skied in an elite division in 1 round and in an age division in another round. In this scenario the skier will have 2 scores for round 1 in terms of overall. Need to determine how to handle this.	
Closed	H	4.0.0.0	Overall Summary	Determine round for each event based on the member id but do not include division	
Closed	H	4.0.0.0	Slalom Entry	Expand optional slalom scoring method (ZBA) to all AWSA divisions	Completed
Closed	H	4.0.0.0	NOPS Tables	Update for 2017	Completed
Closed	H	4.0.0.0	Trick Entry	Eliminate FFLI and change FFLO to FFL. See rule 11.12	Updated
Closed	H	4.0.0.0	Slalom Entry	Allow .75 as fractional score. Collegiate is going to use the mini corse and score mini buoys at 1 half. This can lead to a score of 3 quarters when combined with full buoys.	Added validation to allow .75 for a collegiate tournament but only in a collegiate division.
