

WSTIMS For Windows Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	4.0.0.2	Slalom Entry	Instead of using a dialog box to ask about the next pass for speed or line, use a an area with 2 radio buttons. Set this area in focus rather than opening the dialog box. Ensure that the ENTER key will select the activate the last selected or default value and go to the next pass.	Added 2 buttons for selecting the next speed or next line length. These buttons are only shown when a pass is completed and there is an option allowed. This is different than the popup dialog because this is not modal and allows the user to still navigate around the application but the next pass will not be added until a selection is made. Also the buttons are position below the last completed pass so no useful information is hidden.
Closed	L	4.0.0.2	Slalom Entry	Be sure the handicap and handicap base are on the running order pane in the expanded visible area	Added handicap and handicap base to running order display list
Closed	L	4.0.0.2	Trick Entry	Be sure the handicap and handicap base are on the running order pane in the expanded visible area	Added handicap and handicap base to running order display list
Closed	L	4.0.0.2	Jump Entry	Be sure the handicap and handicap base are on the running order pane in the expanded visible area	Added handicap and handicap base to running order display list
Closed	H	4.0.0.2	Records	Updated records for AWSA, IWWF, and NCWSA	completed
Closed	L	4.0.0.2	Slalom Entry	Add support for requesting a reride when there was a failure of the timing system	Allowed the use of the word "None" to be entered in the time cell for a slalom pass. This will enter a negative value for the time to be treated as a pass without a time
Closed	L	4.0.0.2	Slalom Summary	6 skiers tied for 3rd thru 8th, 3 tie for 3rd, 2 should tie for 6th, and 1 in 8th. Tie breaking not picking up tie for 6th	Fixed functionality to use the actual last pass line length. Prevoiusly the full length was used when below the maximum speed.
Closed	H	4.0.0.2	Slalom Entry	Score is not being calculated correctly when skier reaches maximum allowed speed.	Corrected calculation to detect when at the maximum speed and the actual current line length.
Closed	H	4.0.0.2	Slalom Entry	Not detecting that a new pass should be added when the re-ride option is checked	Corrected functionality to detect when a re-ride has been indicated and then addea row at the same speed and line length.
