WSTIMS For Windows
Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	4.0.1.1	Slalom Entry	M4 skier starts at 34 / 15, next pass 34 / 22, then on the next pass wants to ski 36 / 22 but when selecting Opt Up it sets the pass to 36 / 15 when it should set it to 36 / 22	Fixed determination of line length when selecting speed above division max. This includes divisions where the division max is more than 1 speed below top speed
Closed	L	4.0.1.1	Official Work Record	Exception encountered attempting to update chief scorer. Exception was a System.DBNull casting exception	If the chief official reference on the tournament was null then this was causing the issue. Not sure how this could happen but it seems to happen in some circumstances.
Closed	H	4.0.1.1	Trick Calc	skier did BB, RBB in one pass, then stuck a surface 7F in the second pass, all hand held. The rule reads that under trick #5 I think, one can get credit for up to a 720 in one direction and up to 360 in the other, hence 7F, RO. Looking at that run. I thought that he could get credit for the 7F out of the second pass replacing the initial BB in the first pass and the RBB out of the first pass because another rule reads that we can give him the highest scoring trick under one rule #, etc. The program would not allow it. Is it because the tricks are in two separate passes?)r = ? Please help us all out because they found this issue very interesting and I told them I would get an official answer. It was the most fun I have had a tournament in a while and, as always, I learned something new. Of course, the rest of the tournament was boring and it is difficult to meet 60 new faces in one week-end although I did know our host Randy Hocking.	
Closed	H	4.0.1.1	Trick Calc	For trick number 5 the higher valued trick should be credited regardless of order performed. E.g. if 360 performed and then subsequently a 540 or 720 then the 540 or 720 should be credit and the 360 a repeat. That part seems to be working if it the same pass but nothing in the rule says that has to be the case	
Closed	H	4.0.1.1	Trick Calc	Sequence BB, RBB, …. 7F If in the same pass the 7F is marked credit but both the BB and RBB are being marked repeat. However only the first BB should be a repeat as the reverse should still be allowed. Also, if the 540 or 720 is NC or Fall the originals are not reset to credit.	
Closed	H	4.0.1.1	Trick Calc	Dialog Box being shown when passed marked as END or FALL. This should not be happening.	
Closed	H	4.0.1.1	Slalom Summary	Ties do not seem to be handled correctly. See 17M086	Fixed issue that was happening when there were skiers marked not ready for placement.
Closed	H	4.0.1.1	Master Scorebook	999 showing for placements but it should be asterisks	Update all scorebook summaries to show asterisks instead of 999
