Status	Priority	Program Version	Component	Issue	Notes
Closed	M	5.0.1.13	Running Order	It would be super duper cool if when I set DIV order, I could also set Day and Lake, that way the morning of the event, I don't have to re-click all the little running order division buttons to print Judges and scorers recap sheets. That would make it really easy to re-print running orders too, just for a specific day or lake. (I don't like printing the recap forms at the beginning of the tournament, because there are inevitably changes throughout the day)	Added a feature to save the gorup filter checks, e.g. which boxes were checked and unchecked. Included with the filters I also save the Print Header. A name can be assigned to the saved information and then retrieved.
Closed	H	5.0.1.13	Slalom Entry	Moved to the next pass but realized I choose the wrong line length. When you delete the added pass it doesn't move again to either the line/speed dialog or to the next line without re-entering the speed.	Fixed handling to advance to the next pass when ENTER pressed when in the Boat Time cell and it is not empty
Closed	M	5.0.1.13	Tournament Setup	Create web service to retrieve Sanction information and populate in WSTIMS	
Closed	M	5.0.1.13	Slalom Entry	Skier ran a pass at 55K, 16.00 meters, opted-up and skipped 14.25m going directly to 13.00m. The dialog box on the screen didn't match what they were doing. The Note should have read "Opt up to 13.00M, 55kph" but it instead read "14.25M" – Line Length is correct to the right side of the row	Fixed messaging
Closed	M	5.0.1.13	Slalom Summary	Tournament (Class C, 3 rounds) had "placement" that seemed a bit strange. Does the Tournament summary show ties? If not, how does it "pick" for BEST? Below are the scores for the 2 skiers by round. Attached is my playing with the tournament summary and placement options. Obviously, there BEST score was identical: 2 @ 39 off or 104.0 If you use "FIRST", Jon is first as he scored his 104 in the first and second round. If you use "FINAL", Dave is first as he scores his 104 in the LAST or third round. However, using "BEST" puts Dave in 1st place and Jon in 2nd. Why doesn't it show as a tie? I've played with the settings and I cannot get BEST to come up as a tie. If you have time, can you please explain this? And maybe let me know how to set up the tournament	
Closed	M	5.0.1.13	Add Member	Tried to do a search with only a partial first name on a local search	
Closed	M	5.0.1.13	AWSA and IWWF Records	Updated
