Closed	L	5.0.1.17	Registration Import	Columns VWX have the number of rounds that a skier wants to ski for a particular event in a pick and choose format. Would like to have the import build an appropriate running order per round using this information	Added functionality to analyze the data. Then each skier is added to the running order for the round(s) indicated for each event.	
Closed	L	5.0.1.17	Junior All Stars Report	Have queries I have used for the Eastern Region the past few years. I have a request to make this an actual report and support all regions Here is the data/calculation needed for each junior. R=NOPS for Ranking List Score coming into Regionals S=NOPS Score in that event at Regionals (R * 0.6) + (S *.0.4) = Event Score Event Score Slalom + Event Score Trick + Event Score Jump = All Star Score Report should include B/G 2/3/4 Divisions. Data needed on the Report (Sorted by Division, then by All Star Score) Name Division Slalom Event Score Trick Event Score Jump Event Score All Star Score OR, if it is easier, the report layout could be the following Name Division # of events (1, 2 or 3) All Star	New window added with options to produce all required data. The data will be retrieve and exported as tab delimited text file. Queries are setup to account for the new junior divisions	L
Closed	L	5.0.1.17	Junior Most Improved	Have queries I have used for the Eastern Region the past few years. I have a request to make this an actual report and support all regions		
Closed	H	5.0.1.17	Master Scorebook	If tournament selects placements to be based on the first round and a skier skis in just the 2nd round the score is not being included in the Scorebook nor in the WSP file	Fixed this issue. Can skiers that skied in the just the 2nd round will show a placement of ** which indicates not available for placement. However there score will show up. Note for the scorebook. A skier that just skied in the second round is not available for placement but the scores will show in the first row on the report based on the rule that the first round skied is considered the round 1 score but not for tournament placement purposes.	
Closed	L		Official Work Assignment	If an official is deleted or removed from a role it should be checked to determine if this is the officials only credit for this role and event. If it is then credit should be removed.	Unfortunately I don't think this is practical. It is not possible to determine if the credit was generated from the assignment or manually marked.

Closed	M	5.0.1.17	Official Work Assignment	Consider an alternative imput format that utilizes a template of the common required officials depending on division and tournament class	Added new feature. New icon at top of window "Template". After selecting an event and group you click on this icon. It will insert 6 entries (11 for E/L/R) with predefined work assignments selected. User needs to select an official from the list by double clicking, or using the ENTER key, and then pressing ENTER again to save the assignment. Any entry without an official assigned is not saved and is just discarded when moving to a new group. Also, the list of available officials is now filtered based on the work assignment choosen for the entry. So if "Driver" is selected the list will only contains members with a drivers rating. If "Boat Judge" or "Event Judge" is selected then only members with a judges rating. Same for "Scorer", "Safety", and "Tech Controller". Also added a new work	
Closed	M	5.0.1.17	Slalom Entry	I had someone get a reride because the boat went off the dock at 34 instead of the requested 28 mph. We went in and checked the reride box, filled out the pop-up box with why, and then it added the new line. However, the new line wouldn't let us select a different starting speed. I ended up just deleting the original pass, but it was kinda sad to lose the data that there had been a reride. It wasn't an issue at our tournament, but I could see at high-stakes tourneys needing that info in case of a protest.	Added an enhancement so that if the first pass is marked for a re-ride then it opens up the speed and line selection boxes. These will be disabled one a score has been entered on the 2nd pass.	
Closed	L	5.0.1.17	CodeValueList	Add Guatemala to Federation list. Thinks the code is GTA	Found a full federation list on the HQ database. Add a complete list of known values	`
Closed	M	5.0.1.17	Running Order	When sending running orders for collegiate tournaments it is causing some existing scores to no longer be visible	Running orders were being cleaned up using the EventGroup but for collegiate tournaments the information must be cleaned up by AgeGroup. This has been corrected.	
Closed	H	5.0.1.17	Running Order	Here are the steps that caused the error I mentioned in earlier emails. 1. Open the Running Order screen 2. Changed one person, Elizabeth Mccants from order 1 to 2 (see first two screen shots below) 3. Saved the Running Order screen 4. Closed all windows in WSTIMS (see third screen shot) 5. Tried to close the main window, third screen shot. 6. It won't close. Had to force close in Task Manager.	There appeared to be an issue when the Run Order cell was changed and the Save icon was selected while still in the Run Order cell. The data was not being saved and it was some how leaving the MDI in an active state which was not allowing it to closed. Correct the situation in the Run Order window to save the value in the mentioned condition. I also ensured that that the active state for the MDI was cancelled when attempting to close the application.	
Closed	H	5.0.1.17	Trick Calc	ADD FFL5F Trick submission reviewed and accepted at 950 points	Updated	
Closed	H	5.0.1.17	AWSA and IWWF Records	Update all records for all end of the year records	Updated
