

## WSTIMS For Windows

### Fix List

<b>Status</b>	<b>Priority</b>	<b>Program Version</b>	<b>Component</b>	<b>Issue</b>	<b>Notes</b>
Closed	H	5.0.1.7	Registration Template	When building template it is missing some registered skiers. It looks like if someone registers for a division different than their age group it is not picking them up. Need to review. The processed used for the direct import does seem to be picking up these registrations.	Fixed
Closed	L	5.0.1.7	Official Work Record	Trick and jump event groups are missing from export list	Added fields to export
Closed	H	5.0.1.7	Official Contact	Validation of email addresses is being thrown when no value has been input and just navigating.	Fixed validation to ignore an empty field

## WSTIMS For Windows

### Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	5.0.1.7	Slalom Entry	<p>At the tournament we just finished and was posted on the website, a young mans dad alerted me that his son (Josh Gardner) had skied 1.5 @ 32' off, after completing a 28' off pass. When I went back into the scoring system, the attached excel file is a screen shot of what I saw. It showed a slow boat time although it was a perfect time for the first pass, and a good time for the 1.5 score for the second pass, but a total score of only 1.5 buoys.</p> <p>With some experimentation, I found that if you enter 6's for the first pass with a bad time, then revise the time to a good time, it will show the smiley face and the correct score in the brown boxes, however it retains the checkmark in the reride box. Then, if the next pass is not a full pass, the final score in the brown boxes will revert back to the score of the second pass since the reride box is still checked.</p> <p>At that point in time, it is very easy to think the skier is scored correctly if the scorer has not looked at the total buoys</p>	Needed to reset the Reride indicators when a time is re-entered
Closed	L	5.0.1.7	Running Order	When refreshing the running order on the Live Web it is not handling skiers that have been removed from the event	Added a refresh step to the Live Web update for the running order
